

Our Security, Your Privacy

Centacare Family Services has security cameras in some building entry ways, reception and waiting areas, hallways, and meeting rooms. Our cameras are not hidden and are clearly visible in these areas.

Security cameras are for the safety of our team and our clients. For your privacy, the following principles apply:

- Our camera's do not record audio, only video.
- All recorded footage is stored securely and deleted after 30days.
- Footage will only be accessed in response to an incident occurring.
- Only members of our Executive Management Team can access camera footage.
- Our camera footage will not be released to others; unless required under Law, or in response to an incident occurring.

If you have any questions or concerns about your privacy, please ask to speak with our General Manager Administration.
